Profile Summary

- Motivated and detail-oriented Computer Science student with a strong foundation in **Python, Java**, and web development technologies such as **HTML, CSS, JavaScript**.
- Possesses a solid understanding of data structures and algorithms.
- Demonstrates proficiency in designing and developing interactive web applications.
- Eager to leverage academic training and hands-on project experience to contribute effectively to software development initiatives.

Academic Projects

Shyam Patidar Portfolio

- **Clean and Responsive Design:** Implement a minimalist design with a focus on usability. Ensure the portfolio is responsive, so it looks good on different devices and screen sizes.
- **Visual Appeal with CSS:** Use CSS for styling to create a visually appealing portfolio. Consider using modern CSS features like Flexbox or Grid for layout and transitions/animations to make interactions smooth and engaging.
- **Interactive Elements with JavaScript:** Incorporate JavaScript to add interactive elements such as a dynamic navigation menu, smooth scrolling, and perhaps a lightbox gallery for showcasing projects or images. Ensure JavaScript enhances user experience without overwhelming the design.
- [View Code](#)

Simon Says Game

- **Engaging User Interface:** Design a visually appealing interface using CSS for styling. Incorporate vibrant colors and clear typography to make instructions and feedback easily readable.
- **Interactive Gameplay with JavaScript:** Implement game logic using JavaScript to create an interactive experience. This includes generating random sequences, handling user input, and providing feedback (correct or incorrect) dynamically.
- **Responsive Design:** Ensure the game is responsive to work well on various devices and screen sizes. Use CSS media queries to adjust layout and sizing appropriately, maintaining usability and accessibility across different platforms.
